## TUJTORIAL DOWNLOAD GPS DARI LAPTOP

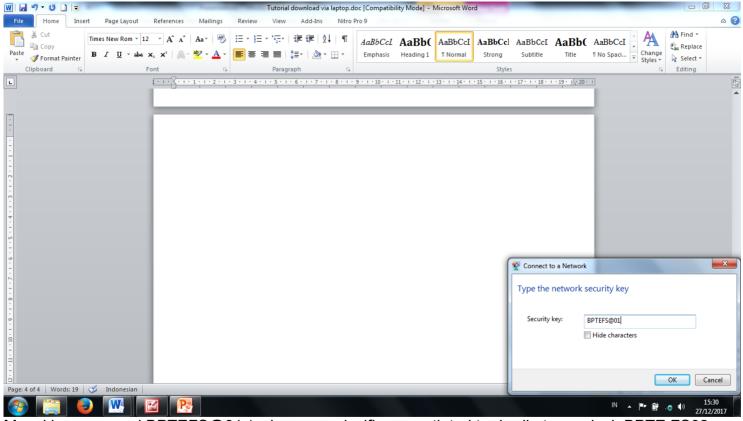

Nyalakan WiFi di box GPS yg terpasang di traktor dengan cara menggeser saklar yg ada di bawah box GPS sehingga lampu indikator bewarna hijau menyala.

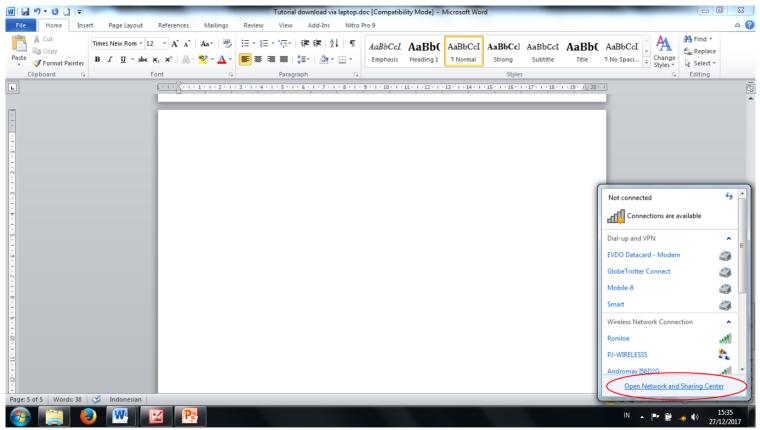

**Perhatian:** saat pemupukan pastikan WiFi kondisi OFF, karena sinyal WiFi dapat mengganggu akurasi tracking GPS.

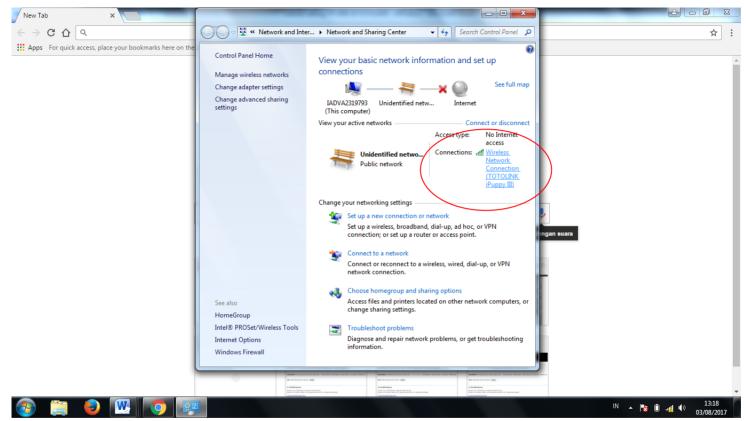

Aktifkan wifi laptop, lalu sambungkan ke wifi GPS contoh: klik conect untuk BPTE FS01

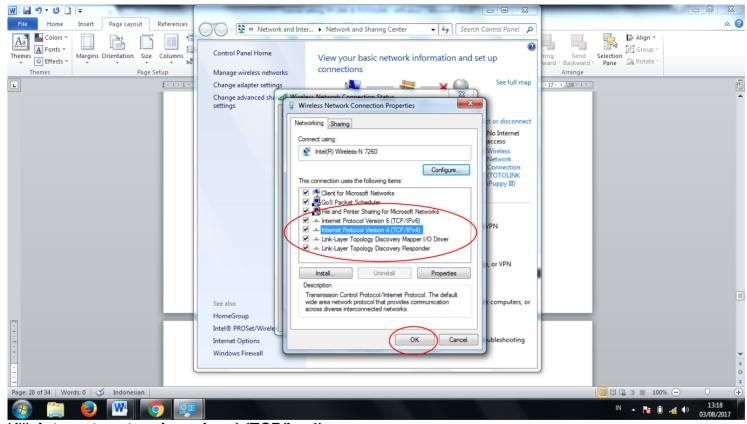

Masukkan pasword BPTEFS@01 (pola pasword wifi sama utk traktor berikutnya misal: BPTE FS02 pwd: **BPTEFS@02**, BPRE FS01 pwd: **BPREFS@01**, LWUE FS01 pwd: **LWUEFS@01**, dst)

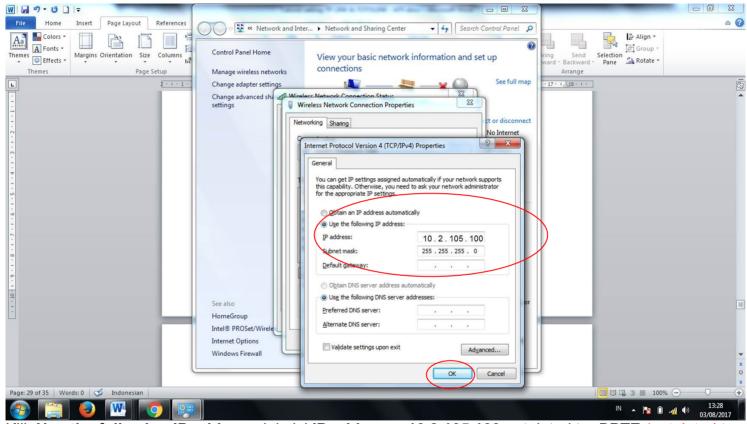

Klik open network and sharing centre

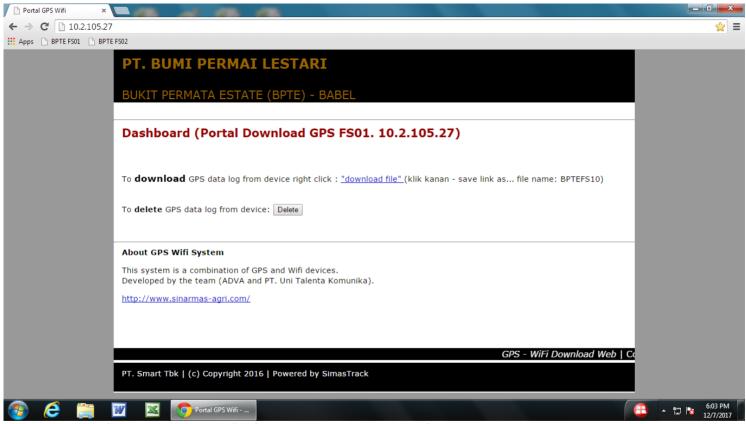

Klik wireless network connection

Klik Internet protocol version 4 (TCP/Ipv4)

Klik Use the following IP address, lalu isi IP address: 10.2.105.100 untuk traktor BPTE (untuk traktor kebun lain misal BPRE ulangi lagi langkah ini dengan mengganti IP address: 10.2.108.100, dan untuk LWUE ganti IP address: 10.2.111.100)

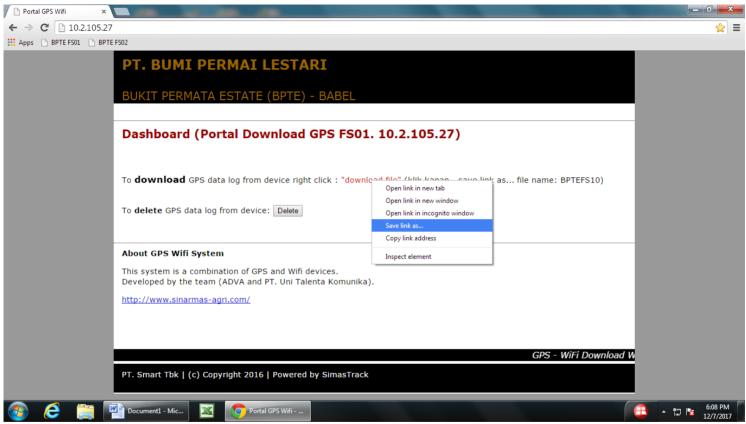

Buka **google Chrome**, ketik IP GPS contoh: untuk BPTE FS01 ketik 10.2.105.27. Maka akan mucul halaman Portal GPS WiFi BPTE.

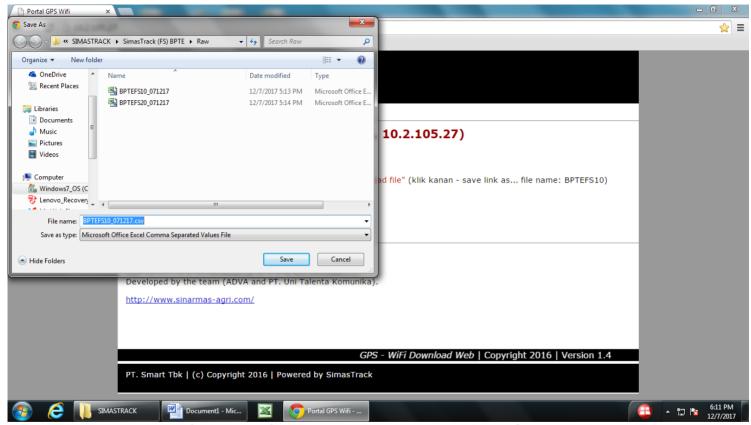

Note: pastikan traktor parkir di sekitar bengkel, dan wifi di box GPS hidup (lampu hijau menyala), saat pemupukan WiFi di box GPS dimatikan.

Daftar IP GPS untuk download di google chrome:
